Milind Patel

Senior Full-Stack Developer

milindpatel4416@gmail.com • 647-273-1722 • milindpatel.github.io • github.com/Milindpatel • Toronto

PROFESSIONAL SUMMARY

Senior full-stack developer with 10+ years of hands-on experience (since 2015) designing, coding, and shipping secure, high-availability web applications with C#, ASP.NET Core, Angular, React, and Microsoft SQL Server on Azure and AWS. Writes production code daily — REST APIs, front-end features, T-SQL and query tuning, Kubernetes deployments behind load balancers, and CI/CD pipelines — across 8 production sites and 12 API integrations, including Google Maps. Remediates security findings directly in code for 4 consecutive years of passed PCI DSS audits, and builds Claude-powered AI agents for complex, multi-step engineering work. Also serves as technical lead for a blended team of 3 in-house and 2 vendor developers.

TECHNICAL SKILLS

Backend	C#, ASP.NET Core, ASP.NET MVC, .NET Framework, .NET Core Web API, RESTful APIs, JSON, Dependency Injection, Google Maps JavaScript API, Geocoding API
Frontend	Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design
Cloud & DevOps	Microsoft Azure, AWS, Azure DevOps, Git, TFS, CI/CD, Kubernetes, Load Balancing, Networking (DNS, SSL/TLS, Firewalls)
Architecture & Patterns	System Architecture, High Availability & Scaling, Layered / N-tier Architecture, MVC, SOLID, RESTful API Design, Event-Driven Messaging (RabbitMQ), ETL (SSIS)
Databases	MS SQL Server, Oracle, T-SQL, SSIS, Stored Procedures, Query Optimization
AI & Prompt Engineering	Claude, Claude Code, Anthropic API, ChatGPT / OpenAI API, Cursor, Groq (Llama 3.3), Prompt Engineering, LLM Integration, RAG / LLM Grounding, Streaming LLM Responses, AI-Assisted Development, AI Agents, Agentic Workflows
Security & Compliance	PCI DSS, OWASP Top 10, Secure Coding, Vulnerability Remediation, Audit Evidence Management
Practices	Agile / Scrum, SDLC, Code Review, Release Management, OOP, UML, JIRA, Technical Leadership
Business Process Management	AWD BPM, IBM BPM

PROFESSIONAL EXPERIENCE

Web Development Manager

Jan 2026 – Present

Rexall, Mississauga

- Architect and develop 8 production sites and 12 API integrations end to end — including Google Maps JavaScript API and Geocoding API for location and address features — on ASP.NET Core Web APIs, Angular/React front ends, and MS SQL Server.
- Write production code daily across the stack — C# services with Dependency Injection and layered architecture, reusable Angular/React components, and T-SQL stored procedures — and tune slow queries through indexing and execution-plan analysis.
- Deploy and operate containerized applications on Kubernetes behind load balancers — configuring deployments, health probes, horizontal scaling, and traffic routing, and working with the networking team on DNS, SSL/TLS, and firewall rules for high availability.
- Build AI agents with Claude and Claude Code that handle complex, multi-step engineering work — codebase analysis, cross-application refactoring, test generation, and audit-evidence preparation.
- Fix PCI DSS and vulnerability-scan findings directly in code across the Magento, .NET, and React applications (OWASP Top 10: XSS, injection, insecure configuration), contributing to 4 consecutive years of passed PCI audits.
- Handle code merges, code drops, hotfix patches, and gated pre-production-to-production releases for multiple ASP.NET C# applications through Azure DevOps CI/CD pipelines, with rollback planning.
- Serve as technical lead for a blended team of 3 in-house and 2 vendor developers — setting solution design, reviewing pull requests, planning sprints with Product, and mentoring engineers on clean code and secure coding.

Technologies: C#, ASP.NET Core, Angular, React, TypeScript, MS SQL Server, T-SQL, Kubernetes, Load Balancing, Azure, AWS, Azure DevOps, Google Maps APIs, Magento, PCI DSS, Claude, AI Agents

Lead Developer
July 2022 – Jan 2026

Rexall, Mississauga

- Built and maintained full-stack features across Rexall's ASP.NET Core and ASP.NET Framework applications with Angular 12 and React 18 front ends, delivering RESTful APIs, reusable UI components, and third-party API integrations.
- Designed T-SQL stored procedures, views, and indexes in MS SQL Server, and optimized long-running queries using execution plans to improve page-load and reporting performance.
- Remediated PCI DSS audit and vulnerability-scan findings across the Magento sites, ASP.NET C# applications, and React applications, and gathered audit evidence, with every annual audit passed.
- Provisioned and configured Azure and AWS components for a security-confidential cloud environment alongside the operations and networking teams.
- Owned code merges, code drops, and patches for pre-production and production, and maintained Azure DevOps build and release pipelines.
- Debugged production issues across UI, API, and database layers, reviewed pull requests, and supported developers with technical problems.

Technologies: ASP.NET Core, ASP.NET Framework, C#, MS SQL Server, Azure DevOps, Angular 12, React 18, JavaScript, JSON, HTML5, CSS3, T-SQL, Magento, PCI DSS

.NET Developer
August 2021 – July 2022

Speridian Technologies, Toronto

- Designed and developed full-stack web applications with Angular 11 and .NET 5 Web APIs, working within an Agile team across every phase of the SDLC.
- Built a RabbitMQ-based integration — message consumers plus scheduled SQL jobs that process queued events and generate downstream data — decoupling upstream systems from reporting workloads.
- Implemented system-wide audit logging with SQL triggers and stored procedures that capture before/after record changes for traceability and support.
- Upgraded and extended Telerik Kendo UI grids, forms, and charts in Angular, replacing custom controls so the team could focus on value-generating features.
- Set up and configured Microsoft Azure cloud components and Azure DevOps pipelines for development, test, and production environments.

Technologies: ASP.NET Core, ASP.NET Framework, C#, Angular 11, .NET 5, MS SQL Server, Azure DevOps, JavaScript, JSON, HTML5, CSS3, T-SQL

Software Engineer
March 2020 – August 2021

Invesco Enterprise Services, Charlottetown

- Partnered with Product Owners and Scrum Masters to translate user stories into automated process flows built in the AWD BPM tool.
- Built rule-driven document-filtering automation using XML logic and Mobius Document Direct, removing manual document-handling steps.
- Developed ASP.NET C# user interfaces for custom internal applications on a modern .NET backend.
- Wrote parameterized stored procedures powering reporting and data retrieval across SQL Server and Oracle.
- Built reusable SSIS ETL packages to ingest flat-file, Excel, and XML sources into SQL Server, plus DTS import/export routines delivering SQL Server data to client-side destinations.

Technologies: ASP.NET, C#, AWD BPM, MS SQL Server, SSIS, Oracle, Jira / Confluence, JavaScript, JSON, HTML5, CSS3, T-SQL

Software Developer
July 2019 – Dec 2019

Bell Canada (MSI Corp), Toronto

- Built Angular front ends backed by ASP.NET Core Web APIs for internal business-process applications.
- Designed and automated business processes in IBM BPM 8.5 — developing Business Process Definitions (BPDs) from requirements and deploying them to test environments.
- Captured data requirements with business analysts through process blueprints and Visio diagrams.
- Validated BPDs with positive and negative test cases, comparing expected and actual results through manual and automated testing.

Technologies: IBM BPM 8.5, Oracle, Jira / Confluence, Microsoft Visio, HTML5, CSS3, JavaScript, Angular, ASP.NET Core, C#, MS SQL Server

Senior Software Developer
Dec 2015 – July 2019

Zerothcode Inc., Toronto, Canada / Anand, India

- Designed and built a School ERP platform on ASP.NET MVC, ASP.NET Core Web API, Angular, and SQL Server that automated school back-office workflows and streamlined resource planning.
- Designed RESTful APIs, SQL Server schemas, and stored procedures, and built responsive Bootstrap UIs across the application.
- Worked directly with clients to turn business requirements into scalable solutions, owning scope definition, estimation, planning, and tracking for API and application development.
- Mentored junior developers through code reviews and pairing, establishing coding standards across design, coding, testing, and debugging.

Technologies: HTML5, CSS3, ASP.NET MVC, ASP.NET Core Web API, C#, Angular, MS SQL Server, JavaScript, Bootstrap 3

EDUCATION

Post-Graduation (Mobile Application Design and Development) Sep 16 - Apr 18
Lambton College, Toronto, Toronto, Canada · Score: 3.8/4.0

Bachelor's degree (Computer Engineering) July 12 - May 16
A.D. Patel Institute of Technology (GTU), Gujarat, India · Score: 6.94/10

CERTIFICATIONS

- AWS Certified Solution Architect - Professional
- AWS Certified Developer - Associate

PROJECTS

Mobile Blood Bank — A.D. PATEL Institute of Tech
Android (JAVA), MySQL, ASP.NET
