Milind Patel

Senior Full-Stack Developer & Web Development Manager

milindpatel4416@gmail.com • 647-273-1722 • milindpatel.github.io • github.com/Milindpatel • Toronto, ON

PROFESSIONAL SUMMARY

Senior full-stack developer and web development manager with 10+ years of experience building complex, high-availability web systems with C#, ASP.NET Core, Angular, React, and SQL Server on Azure and AWS. Builds Claude-powered AI agents that cut a recurring engineering task from ~2 weeks to about 1 day. Architects and maintains 8 applications and 12 API integrations, has helped pass 4 consecutive annual PCI DSS audits, leads a team of 5 developers, and has delivered an estimated $60K+ in annual savings.

TECHNICAL SKILLS

AI & Prompt Engineering	AI Agents, Agentic Workflows, Claude, Claude Code, Anthropic API, OpenAI API, Prompt Engineering, RAG
Backend	C#, ASP.NET Core, ASP.NET MVC, .NET Framework, Web API, RESTful APIs, Dependency Injection
Frontend	Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap
Cloud & DevOps	Microsoft Azure, Azure App Service, AWS, Kubernetes, Load Balancing, Azure DevOps CI/CD, Git, Application Insights
Architecture & Integrations	System Architecture, BFF, Resilience Patterns, Event-Driven (RabbitMQ), Legacy Modernization, Google Maps & Geocoding APIs, Payment Tokenization
Databases	SQL Server, T-SQL, Query Optimization, Oracle, SSIS
Security & Compliance	PCI DSS (v3.2.1, v4.0, v4.0.1), OWASP Top 10, Secure Coding, Vulnerability Remediation
Practices	Agile / Scrum, Code Review, Release Management, Technical Leadership, Jira, AWD & IBM BPM

PROFESSIONAL EXPERIENCE

Web Development Manager

Jan 2026 – Present

Rexall Pharmacy Group, Mississauga, ON

- Designed Claude-powered AI agents, now used across the team, for impact analysis, legacy-code refactoring, test generation, and audit-evidence preparation — cutting a recurring monthly task from ~2 weeks to about 1 day (~90% faster) and saving ~850 engineering hours (~$45K) a year.
- Architect, maintain, and develop 8 applications (5 customer-facing, 3 internal) and 12 API integrations — Angular and React front ends, ASP.NET Core and ASP.NET Framework back ends, SQL Server, and Magento.
- Set up Azure DevOps CI/CD pipelines for 4 Azure App Service applications in 3 days, replacing 2–4-hour manual releases and saving ~170 engineering hours (~$9K) a year across 8–12 monthly releases.
- Optimized Azure and AWS resources across the application estate, cutting cloud spend by over $10K a year.
- Built location and address features with the Google Maps JavaScript and Geocoding APIs, caching results within Google's 30-day limit to cut API cost, and integrated payment token providers as in-scope PCI DSS components.
- Designed an ASP.NET Core Backend-for-Frontend (BFF) integration layer with retry, timeout, and circuit-breaker policies, and lead the incremental modernization of legacy ASP.NET Framework applications to ASP.NET Core.
- Run containerized ASP.NET Core services on Kubernetes behind load balancers (health probes, Horizontal Pod Autoscaler), and troubleshoot production issues across application, database, and network layers with Application Insights.
- Own PCI DSS v4.0.1 compliance across the Magento, .NET, and React applications — remediating OWASP Top 10 findings and compiling audit evidence — passing 4 consecutive annual audits through the moves from v3.2.1 to v4.0 and v4.0.1.
- Lead a team of 5 developers (3 in-house, 2 vendor) through design and PR reviews, sprint planning with Product, and vendor and security assessments.

Technologies: Claude, AI Agents, C#, ASP.NET Core, Angular, React, SQL Server, Kubernetes, Azure App Service, Azure DevOps, AWS, Google Maps APIs, Magento, PCI DSS v4.0.1

Lead Developer

Jul 2022 – Jan 2026

Rexall Pharmacy Group, Mississauga, ON

- Developed full-stack features across Rexall's applications with Angular 12, React 18, ASP.NET Core, and ASP.NET Framework, including RESTful APIs and third-party integrations.

- Resolved database bottlenecks by rewriting complex T-SQL stored procedures, adding indexes, and analyzing execution plans, speeding up page loads and long-running reports.
- Remediated PCI DSS audit and vulnerability-scan findings across the Magento, ASP.NET, and React applications and prepared audit evidence, with every annual audit passed.
- Owned code merges, releases, and patches across multiple ASP.NET applications, maintained Azure DevOps pipelines, and provisioned Azure and AWS components with the operations and networking teams.

Technologies: C#, ASP.NET Core, ASP.NET Framework, Angular 12, React 18, SQL Server, T-SQL, Azure DevOps, Magento, PCI DSS

.NET Developer
Aug 2021 – Jul 2022

Speridian Technologies, Toronto, ON

- Designed and developed full-stack web applications with Angular 11 and .NET 5 Web APIs in an Agile team.
- Built an event-driven RabbitMQ integration with message consumers and scheduled SQL jobs, decoupling upstream systems from reporting workloads.
- Implemented system-wide audit logging with SQL triggers and stored procedures, and extended Kendo UI for Angular components.

Technologies: C#, .NET 5, ASP.NET Core, Angular 11, Kendo UI for Angular, RabbitMQ, SQL Server, Azure

Software Engineer
Mar 2020 – Aug 2021

Invesco Enterprise Services, Charlottetown, PE

- Translated user stories into automated process flows on the DST AWD BPM platform with Product Owners and Scrum Masters.
- Built document-filtering automation with XML logic and ASG Mobius Document Direct, and ASP.NET C# interfaces for internal applications.
- Built reusable SSIS ETL packages and parameterized stored procedures loading flat-file, Excel, and XML data into SQL Server.

Technologies: C#, ASP.NET, DST AWD, SQL Server, SSIS, Oracle, Jira / Confluence

Software Developer
Jul 2019 – Dec 2019

Bell Canada (MSI Corp), Toronto, ON

- Built Angular front ends on ASP.NET Core Web APIs, and designed, built, and tested IBM Business Process Manager 8.5 process definitions from business requirements.

Technologies: Angular, ASP.NET Core, C#, IBM BPM 8.5, SQL Server, Oracle

Senior Software Developer
Dec 2015 – Jul 2019

Zerothcode Inc., Toronto, ON / Anand, India

- Architected and built a multi-module School ERP platform on ASP.NET MVC, ASP.NET Core Web API, Angular, and SQL Server that automated school back-office workflows.
- Owned client requirements, estimation, and delivery tracking, and mentored junior developers through code reviews.

Technologies: C#, ASP.NET MVC, ASP.NET Core Web API, Angular, SQL Server, Bootstrap

EDUCATION

Ontario College Graduate Certificate, Mobile Application Design and Development
Sep 2016 – Apr 2018
Lambton College, Toronto, ON · Score: 3.8/4.0

Bachelor of Engineering (B.E.), Computer Engineering
Jul 2012 – May 2016
A. D. Patel Institute of Technology (Gujarat Technological University), Anand, Gujarat, India · Score: 6.94/10

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified Developer – Associate

PROJECTS

Mobile Blood Bank — Academic project, A. D. Patel Institute of Technology
Android (Java), MySQL, ASP.NET
