Milind Patel

Senior Full-Stack Developer & Web Development Manager

milindpatel4416@gmail.com • 647-273-1722 • milindpatel.github.io • github.com/Milindpatel • Toronto, ON

PROFESSIONAL SUMMARY

Senior full-stack developer and web development manager with 10+ years of experience building complex, high-availability web systems with C#, ASP.NET Core, Angular, React, and SQL Server on Azure and AWS. At Rexall, architects and maintains 8 applications and 12 API integrations, leads a team of 3 in-house and 2 vendor developers, and leads PCI DSS remediation and evidence preparation across four consecutive successful annual assessments. Builds Claude-powered AI agents that the team uses for complex engineering work.

TECHNICAL SKILLS

Languages & Frameworks	C#, ASP.NET Core, ASP.NET MVC (.NET Framework), Web API, TypeScript, JavaScript, Angular, React, HTML5 / CSS3
Architecture & Integration	System Architecture, RESTful APIs, Backend-for-Frontend (BFF), Resilience Patterns, Event-Driven Messaging (RabbitMQ), Legacy Modernization, SOLID / Dependency Injection, Google Maps & Geocoding APIs, Payment Tokenization
Cloud & DevOps	Microsoft Azure, AWS, Kubernetes, Load Balancing, Azure DevOps CI/CD, Git, Azure Application Insights
Data	SQL Server, T-SQL, Query Optimization, Oracle, SSIS
AI	Claude, Claude Code, Anthropic API, OpenAI API, AI Agents, Prompt Engineering, RAG
Security & Compliance	PCI DSS v4.0.1, OWASP Top 10, Secure Coding, Vulnerability Remediation
Practices	Agile / Scrum, Code Review, Release Management, Technical Leadership, Jira

PROFESSIONAL EXPERIENCE

Web Development Manager

Jan 2026 – Present

Rexall Pharmacy Group, Mississauga, ON

- Own architecture and delivery for 8 applications (5 customer-facing, 3 internal) and 12 API integrations — Angular and React front ends, ASP.NET Core and ASP.NET (.NET Framework) back ends, SQL Server, and Magento — authoring design documents and impact analyses for cross-application changes.
- Built Claude-powered AI agents that the team now uses for complex, multi-step work — cross-application impact analysis, legacy-code refactoring, test generation, and PCI evidence preparation — and wrote the team's prompt-engineering guidelines.
- Lead a blended team of 3 in-house and 2 vendor developers through architecture and design reviews, PR reviews, sprint planning with Product, and vendor and security assessments.
- Lead PCI DSS v4.0.1 work for the Magento, .NET, and React applications — remediating vulnerability-scan findings (OWASP Top 10), enforcing secure coding, and preparing assessment evidence — extending four consecutive successful annual assessments across both Rexall roles.
- Troubleshoot complex production issues across application, database, and network layers with Azure Application Insights, and partner with the networking team on DNS, SSL/TLS, and firewall changes.

Technologies: C#, ASP.NET Core, Angular, React, SQL Server, Azure, AWS, Kubernetes, Magento, PCI DSS v4.0.1, Claude, AI Agents

Lead Developer

Jul 2022 – Jan 2026

Rexall Pharmacy Group, Mississauga, ON

- Designed a resilient integration layer — an ASP.NET Core Backend-for-Frontend (BFF) API for the Angular and React front ends, with retry, timeout, and circuit-breaker policies for internal and third-party APIs.
- Led the incremental modernization of legacy ASP.NET (.NET Framework) applications to ASP.NET Core, separating tightly coupled modules into independently deployable services using Dependency Injection, the Strategy pattern, and layered architecture.
- Set up containerized ASP.NET Core services on Kubernetes behind load balancers — deployments, liveness and readiness probes, and Horizontal Pod Autoscaler rules — to keep sites available during releases and traffic spikes.
- Delivered map-based location and address features with the Google Maps JavaScript API and Geocoding API, caching geocoded results within Google's 30-day limit to control API usage and cost.

- Integrated payment token providers for checkout, building the payment integrations as in-scope PCI DSS components that meet its secure-coding and audit requirements.
- Built full-stack features with Angular 12, React 18, and ASP.NET Core, and resolved database bottlenecks by rewriting complex T-SQL stored procedures, adding indexes, and tuning execution plans.
- Remediated PCI DSS findings and prepared assessment evidence through the transition from PCI DSS v3.2.1 to v4.0, with every annual assessment successful.
- Owned source-control integration, releases, and production patches through Azure DevOps CI/CD pipelines, and provisioned Azure and AWS components for a secure cloud environment.

Technologies: C#, ASP.NET Core, ASP.NET (.NET Framework), Angular 12, React 18, SQL Server, T-SQL, Kubernetes, Azure DevOps, Google Maps APIs, Payment Tokenization, Magento

.NET Developer
Aug 2021 – Jul 2022

Speridian Technologies, Toronto, ON

- Designed and developed full-stack web applications with Angular 11 and .NET 5 Web APIs across the full SDLC in an Agile team.
- Built an event-driven integration on RabbitMQ, with message consumers and scheduled SQL jobs generating downstream data, decoupling upstream systems from reporting workloads.
- Implemented system-wide audit logging with SQL triggers and stored procedures, and extended Kendo UI for Angular components to speed up UI delivery.

Technologies: C#, .NET 5, ASP.NET Core, Angular 11, Kendo UI for Angular, RabbitMQ, SQL Server, Azure, Azure DevOps

Software Engineer
Mar 2020 – Aug 2021

Invesco Enterprise Services, Charlottetown, PE

- Translated user stories into automated process flows on the DST AWD (Automated Work Distributor) BPM platform with Product Owners and Scrum Masters.
- Built rule-driven document-filtering automation with XML logic and ASG Mobius Document Direct, and ASP.NET C# interfaces for internal applications.
- Built reusable SSIS ETL packages and parameterized stored procedures that load flat-file, Excel, and XML data into SQL Server for reporting.

Technologies: C#, ASP.NET, DST AWD, ASG Mobius, SQL Server, SSIS, Oracle, Jira / Confluence

Software Developer
Jul 2019 – Dec 2019

Bell Canada (MSI Corp), Toronto, ON

- Built Angular front ends on ASP.NET Core Web APIs, and designed, built, and tested IBM Business Process Manager 8.5 process definitions from requirements gathered with business analysts.

Technologies: Angular, ASP.NET Core, C#, IBM BPM 8.5, SQL Server, Oracle

Senior Software Developer
Dec 2015 – Jul 2019

Zerothcode Inc., Toronto, ON / Anand, India

- Architected and built a multi-module School ERP platform on ASP.NET MVC, ASP.NET Core Web API, Angular, and SQL Server that automated school back-office workflows.
- Owned client requirements, estimation, and delivery tracking, and mentored junior developers through code reviews.

Technologies: C#, ASP.NET MVC, ASP.NET Core Web API, Angular, SQL Server, Bootstrap

EDUCATION

Ontario College Graduate Certificate, Mobile Application Design and Development
Sep 2016 – Apr 2018
Lambton College, Toronto, ON

Bachelor of Engineering (B.E.), Computer Engineering
Jul 2012 – May 2016
A. D. Patel Institute of Technology (Gujarat Technological University), Anand, Gujarat, India

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified Developer – Associate

PROJECTS

AI-Powered Portfolio Website — milindpatel.github.io — resume-driven React site with a streaming AI chat assistant (Cloudflare Worker + Groq), deployed via GitHub Actions.
React 18, TypeScript, Vite, Cloudflare Workers, GitHub Actions
