

Milind Patel

Web Development Manager

milindpatel4416@gmail.com • [647-273-1722](tel:647-273-1722) • milindpatel.github.io • github.com/Milindpatel • Toronto

PROFESSIONAL SUMMARY

Web Development Manager and full-stack engineer with 10+ years of experience (since 2015) delivering scalable, secure web applications and leading cross-functional engineering teams. Deep expertise across the .NET ecosystem, modern JavaScript frameworks (Angular, React), cloud platforms (Azure and AWS), and Microsoft SQL Server — paired with a strong track record in Agile delivery, CI/CD, and mentoring high-performing teams. A strong advocate for AI-assisted development and Claude prompt engineering, building practical LLM workflows that accelerate delivery and elevate engineering quality.

TECHNICAL SKILLS

Frontend	Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design
Backend	C#, ASP.NET Core, ASP.NET MVC, .NET Framework, .NET Core Web API, RESTful APIs, JSON
AI & Prompt Engineering	Claude, Claude Code, Anthropic API, ChatGPT / OpenAI API, Cursor, Groq (Llama 3.3), Prompt Engineering, LLM Integration, RAG / LLM Grounding, Streaming LLM Responses, AI-Assisted Development
Cloud & DevOps	Microsoft Azure, AWS, Azure DevOps, Git, TFS, CI/CD
Databases	MS SQL Server, Oracle, T-SQL, SSIS
Business Process Management	AWD BPM, IBM BPM
Practices & Leadership	Agile / Scrum, SDLC, Team Leadership, Code Review, JIRA, OOP, UML, BRD

PROFESSIONAL EXPERIENCE

Web Development Manager

Rexall, Mississauga

Jan 2026 – Present

- Directly lead and manage a team of developers — assigning and prioritizing work, conducting code reviews, mentoring, and owning their technical growth and delivery.
- Leverage AI-assisted development and Claude prompt engineering to accelerate delivery, automate repetitive tasks, and improve code quality across the team.
- Maintain and enhance a security-confidential Azure cloud environment within a highly collaborative operations team, introducing best practices for remediation.
- Manage PCI DSS compliance for Rexall's Magento e-commerce applications — leading audits, coordinating with auditors and internal teams, compiling audit evidence, remediating findings, and enforcing secure-coding standards and vulnerability-scan reviews.
- Set up and configure Microsoft Azure and AWS cloud computing platform components.
- Create code drops and patches for deployment across pre-production and production environments within secure systems.
- Coordinate with external teams and stakeholders to assess the impact of changes and complete release work.

- Perform code-merge activities across multiple ASP.NET C# applications.
- Analyze functional requirements and deliver design solutions using the latest .NET framework with MS SQL Server.

Technologies: ASP.NET Core, C#, Azure DevOps, Angular, React, MS SQL Server, CI/CD, Agile / Scrum, Magento, PCI DSS, Claude, Prompt Engineering, Team Leadership

Lead Developer

July 2022 – Jan 2026

Rexall, Mississauga

- Streamlined the implementation of a security-confidential Azure cloud environment within a highly collaborative operations team, introducing best practices for remediation.
- Managed PCI DSS compliance for the Magento e-commerce applications, coordinating audits, gathering audit evidence, remediating audit and vulnerability-scan findings, and applying PCI secure-coding practices across Magento and ASP.NET C# applications.
- Set up and configured Microsoft Azure and AWS cloud computing platform components.
- Created code drops and patches for deployment across pre-production and production environments within secure systems.
- Coordinated with external teams and stakeholders to assess the impact of changes and complete release work.
- Performed code-merge activities across multiple ASP.NET C# applications.
- Supported developers with troubleshooting and technical issues, and led project risk and issue identification and management.
- Analyzed functional requirements and delivered design solutions using the latest .NET framework with MS SQL Server.

Technologies: ASP.NET Core, ASP.NET Framework, C#, MS SQL Server, Azure DevOps, Angular 12, React 18, JavaScript, JSON, HTML5, CSS3, T-SQL, Magento, PCI DSS

.NET Developer

August 2021 – July 2022

Speridian Technologies, Toronto

- Worked within an Agile team across all phases of the software development lifecycle, delivering solutions to complex business problems.
- Designed automation processes and SQL jobs to generate data based on RabbitMQ integration.
- Designed and developed web applications using Angular 11 and .NET 5.
- Updated Telerik Kendo UI controls to accelerate development and focus on value-generating features.
- Set up and configured Microsoft Azure cloud computing platform components.
- Designed stored procedures with SQL triggers to implement system-wide audit logging.

Technologies: ASP.NET Core, ASP.NET Framework, C#, Angular 11, .NET 5, MS SQL Server, Azure DevOps, JavaScript, JSON, HTML5, CSS3, T-SQL

Software Engineer

March 2020 – August 2021

Invesco Enterprise Services, Charlottetown

- Collaborated with Product Owners and Scrum Masters to translate user stories into process flows built with the AWD BPM tool.
- Designed automation processes for data filtering using XML logic and Mobius Document Direct.
- Built robust user interfaces for custom applications on a modern .NET backend.
- Created multiple parameterized stored procedures to power reporting and data retrieval.
- Developed SSIS packages and DTS import/export routines to transfer data from SQL Server to client-side destinations.
- Built reusable SSIS packages to extract data from flat files, Excel, and XML sources into SQL Server.

Technologies: ASP.NET, C#, AWD BPM, MS SQL Server, SSIS, Oracle, Jira / Confluence, JavaScript, JSON, HTML5, CSS3, T-SQL

Software Developer

July 2019 – Dec 2019

Bell Canada (MSI Corp), Toronto

- Partnered with business analysts to capture data requirements through process blueprints and Visio diagrams.
- Analyzed and designed business process automation using the IBM BPM 8.5 tool.
- Built world-class web application interfaces using Angular and an ASP.NET Core backend.
- Developed Business Process Definitions (BPDs) from business requirements and deployed them to test environments.
- Tested and validated BPDs with positive and negative test cases, comparing expected and actual results through manual and automated testing.

Technologies: IBM BPM 8.5, Oracle, Jira / Confluence, Microsoft Visio, HTML5, CSS3, JavaScript, Angular, ASP.NET Core, C#, MS SQL Server

Senior Software Developer

Dec 2015 – July 2019

Zerothcode Inc., Toronto, Canada / Anand, India

- Contributed as a core team member across design, coding, testing, and debugging operations.
- Served in a client-facing role, translating business requirements into scalable, viable solutions.
- Developed School ERP software that streamlined resource planning and reduced back-office workload through process automation.
- Supported scope definition, planning, estimation, and tracking for API and application development.
- Trained and mentored junior team members, leading the team to maximize business value and achieve IT goals.

Technologies: HTML5, CSS3, ASP.NET MVC, ASP.NET Core Web API, C#, Angular, MS SQL Server, JavaScript, Bootstrap 3

EDUCATION

Post-Graduation (Mobile Application Design and Development)

Sep 16 - Apr 18

Lambton College, Toronto, Toronto, Canada · Score: 3.8/4.0

Bachelor's degree (Computer Engineering)

July 12 - May 16

A.D. Patel Institute of Technology (GTU), Gujarat, India · Score: 6.94/10

CERTIFICATIONS

- AWS Certified Solution Architect - Professional
- AWS Certified Developer - Associate

PROJECTS

Mobile Blood Bank — A.D. PATEL Institute of Tech

Android (JAVA), MySQL, ASP.NET
